SUMMARY

Full-Stack MERN Developer with a strong foundation in Data Structures Algorithms and Competitive Programming. Experienced in building scalable web applications, designing RESTful APIs, and developing efficient software using modern development practices.

EDUCATION

Ajay Kumar Garg Engineering College <i>Bachelor of Technology in Computer Science Engineering; CGPA: 8.6</i>	Ghaziabad, India 2024 – Present
Lucknow Public School <i>Higher Secondary (CBSE) – 91.8%</i>	Lucknow, India 2023
Lucknow Public School <i>Secondary (CBSE) – 94.5%</i>	Lucknow, India 2021

PROJECTS

Canteeno <i>React, Node.js, Express.js, MongoDB</i>	GitHub • Live Demo
- Developed a full-stack smart canteen management platform with secure JWT authentication, role-based access control, and a responsive ordering workflow for students and canteen staff. - Implemented cart, checkout, and real-time order tracking, streamlining the complete food ordering process from selection to fulfillment. - Integrated an AI-powered chatbot for menu assistance and order-related queries while designing scalable RESTful APIs backed by a normalized MongoDB database.	
VibeTube <i>React, Node.js, Express.js, MongoDB, Cloudinary</i>	GitHub • Live Demo
- Built a production-ready YouTube-inspired MERN platform supporting secure authentication, video uploads, comments, likes, subscriptions, playlists, and watch history. - Designed scalable RESTful APIs following the MVC architecture and implemented JWT authentication with refresh-token rotation for secure session management. - Integrated Cloudinary for media storage and delivery, utilized MongoDB Atlas for cloud database management, and deployed the backend on Render.	

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL, HTML/CSS
Technologies: React.js, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS
Developer Tools: Git, GitHub, Postman, VS Code, Render, Vercel
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Concepts: REST APIs, JWT Authentication, MVC Architecture

LEADERSHIP & ACTIVITIES

Web Developer <i>Blockchain Research Lab (BRL), AKGEC</i>	Oct. 2025 – Present
- Developed and maintained web modules for the society's flagship recruitment portal using modern web technologies. - Collaborated with cross-functional team members to develop responsive web interfaces and integrate frontend components with backend services. - Contributed to feature development, testing, debugging, and deployment to enhance application reliability and user experience.	

ACHIEVEMENTS

- Solved 400+ Data Structures & Algorithms problems on LeetCode, strengthening analytical thinking and problem-solving skills.
- Designed, developed, and deployed production-ready MERN applications with secure authentication, RESTful APIs, and cloud deployment.
- Actively practice Competitive Programming on LeetCode and Codeforces to strengthen algorithmic thinking and coding efficiency.
