

Vaibhav Kumar Shukla

+91-8400777282 — imvksofficial@gmail.com — LinkedIn — GitHub — Portfolio — LeetCode

SUMMARY

Full-Stack MERN Developer with a strong foundation in Data Structures Algorithms and Competitive Programming. Experienced in building scalable web applications, designing RESTful APIs, and developing efficient software using modern development practices.

EDUCATION

Ajay Kumar Garg Engineering College <i>Bachelor of Technology in Computer Science Engineering; CGPA: 8.6</i>	Ghaziabad, India 2024 – Present
Lucknow Public School <i>Higher Secondary (CBSE) – 91.8%</i>	Lucknow, India 2023
Lucknow Public School <i>Secondary (CBSE) – 94.5%</i>	Lucknow, India 2021

PROJECTS

VibeTube <i>React, Node.js, Express.js, MongoDB, Cloudinary</i> • Built a YouTube-inspired MERN platform with authentication, video uploads, comments, likes, subscriptions, playlists, and watch history. • Developed MVC-based REST APIs with JWT refresh-token authentication, MongoDB Atlas, Cloudinary, and Render deployment.	GitHub • Live Demo
Hostel Saathi <i>React, Node.js, Express.js, MongoDB, JWT, Brevo, Cloudinary</i> • Built a role-based hostel grievance platform for AKGEC with student and admin portals for complaint tracking, resolution, and escalation. • Implemented OTP verification, JWT authentication, RBAC, Cloudinary evidence uploads, audit trails, and hostel-wise analytics.	GitHub • Student Portal • Admin Panel
BRL Society Website <i>React, TypeScript, Tailwind CSS, Vite</i> • Developed a responsive Blockchain Research Lab website showcasing research, events, projects, team, and alumni. • Built animated UI sections, event showcases, and an interactive alumni network visualization with a futuristic blockchain theme.	GitHub • Live Demo
VendorSaathi <i>Node.js, Express.js, MongoDB, Groq API, JWT, Zod</i> • Built an AI-powered backend for street vendors with JWT authentication, sales/expense tracking, government schemes, and RESTful APIs. • Integrated Groq LLM for demand and cash-flow insights with Zod validation, rate limiting, error handling, and MongoDB indexing.	GitHub • Live Demo

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL, HTML/CSS
Technologies: React.js, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS
Developer Tools: Git, GitHub, Postman, VS Code, Render, Vercel
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Concepts: REST APIs, JWT Authentication, MVC Architecture

LEADERSHIP & ACTIVITIES

Web Developer <i>Blockchain Research Lab (BRL), AKGEC</i> • Developed and maintained web modules for the society's flagship recruitment portal using modern web technologies. • Collaborated with cross-functional team members to develop responsive web interfaces and integrate frontend components with backend services. • Contributed to feature development, testing, debugging, and deployment to enhance application reliability and user experience.	Oct. 2025 – Present
---	---------------------

ACHIEVEMENTS

- Solved 400+ Data Structures & Algorithms problems on LeetCode and actively practice Competitive Programming on Codeforces, strengthening problem-solving and algorithmic thinking.
- Developed and deployed production-ready MERN applications with secure authentication and RESTful APIs, including the BRL Society Website and Hostel Saathi as real-world college-level projects at AKGEC.
- Successfully completed the 6-week **Full Stack Developer Bootcamp – Master Frontend to Backend** by GeeksforGeeks ([Certificate Link](#)).
